8000

blueberry harvester

8000

Fresh Market Harvester

Oxbo continues the legacy of Korvan harvesters which have set the standard for fresh market harvesting and have offered **unbeatable rotary heads** for over 20 years. The **free floating head design** continues to surpass other available styles as it moves with your plants to **eliminate raking and damage**. With an **adjustable head brake, food grade rod coating,** and adjustment from the drivers platform, the 8000 delivers the highest quality fruit.

Superior Fruit

- **Single drop harvester:** Blueberries are conveyed to the back of the machine where they are cleaned and put into totes or lugs. Together the single drop and an effective fan cleaner system give you the highest quality fruit.
- **Solid stainless steel sides**
- **Low profile cane lifter design**

Superior Quality

The Oxbo 8000 blueberry harvester features a reliable Cummins® 63hp diesel engine. Key harvester components, like catchers, buckets, and belts have been chosen to provide a long life in the field. Season after season the model 8000 has proven to consistently harvest the highest quality fruit and to deliver:

- **Great visibility**
- **Low noise**
- **Low maintenance**

Superior Catching

The Ultra Low Loss catchers in the Korvan 8000 **have been field proven to retain more fruit than any other catcher style on the market.** These high density catchers feature 4¾ inch spacing. Oxbo design engineers continue to work with customers to improve fruit retention in blueberry harvesting.

Picking system choices: Your choice in picking heads, including the industry-leading Orbirotor, allows you to customize the 8000 to your field conditions

High picking tunnel: The picking height range of 88-113 inches allows the 8000 to pick larger plants

Air conditioned cab: Optional cab for increased operator comfort

Low picking height: The 8000 picks lower on the plant for better picking action and better fruit quality

Nose cones and cane lifters: The low profile nose cones and cane lifter design gently transitions the plant into the picking tunnel to maximize fruit retention

Ultra Low Loss catchers: The 8000 gets the catchers lower on the plant and field tests prove this system retains more fruit than the competition

On-board storage: Ample storage on both sides of the harvester

Customized Picking

Orbirotor® System: The Korvan brand **pioneered the rotary picking style and has been the market leader in fresh market harvesting for over 20 years.**

The Orbirotor utilizes an orbital shaking action in a free-floating head delivering less plant damage than fixed head designs. The gentle shake provides the most selective pick on the market so you can take advantage of the early season and fresh market prices.

Dynarotor® System uses a more aggressive horizontal shaking action.

Sway System brings traditional sway picking action that removes fruit by swaying the plants back and forth as a group.

Options

- Big Foot tires & rims (42 x 25 -20)
- Posi-traction
- Traction Package: Includes posi-traction and Big Foot tires and rims
- Food grade oil
- Tote loader
- Automatic steering
- Top beater
- Side guard lower belts
- Air conditioned cab

Single drop harvester: A single belt efficiently moves fruit to the cleaning system and the 8000 boasts the lowest fruit drop (in inches) of any harvester
