

7440 Berry Harvester

OXBO

NEW FEATURES

- **Eco-Mode** – Designed to run the engine only as hard as conditions dictate. In certain conditions growers realized a 50% fuel savings! In Eco-Mode harvester noise is dramatically reduced.
- **7" high-resolution color display** - New, integrated harvester control system. Many of the operational controls and gauges have been integrated into this new control center offering an improved dash layout and function.
- **Head Speed Control** – Maintains a more accurate speed on the shakers. We can now control to ± 5 rpm. When we stop at the end of a row, the controller will go back to the previous set point when you enter a new row.
- **Total Control Joystick** - Puts all of the major machine functions at your fingertips.
- **Bi-Lingual Display** – English or Spanish
- **Cruise-Control** – Set the cruise control and the harvester will maintain your set speed. It even resumes your speed when you enter a new row.
- **Auto-Height Function** – Growers can set a ground height and machine will maintain it throughout the row.
- **Acreage Counter** – Enter your row spacing and machine will count how many acres you pick in a day, week, season, and life of the harvester.
- **Steering Position Indicator** – Displays current position of the front wheels.
- **More available torque in road gear.**
- **Improved Cooling Capability** – Engine radiator has increased capacity to handle higher temperatures during the picking season; a remote hydraulic oil cooler was added to keep the hydraulic system cool.
- **Grated Center Deck Option** – For those who want to look back from the operator's seat and see the row they are picking (does not meet GAP standard).
