

NEW 3130 Harvester

The new 3130 replaces our longstanding model, the 3016XL. The 3000 series has long been Oxbo's entry level harvester, giving customers the ability to purchase a maneuverable, self-propelled, single-function harvester at a lower price point.

Features

- **NEW** display for all functions
 - Still uses manual manifold controls for setting speeds
- **NEW** optional FleetCommand
- Ability to integrate Oxbo YieldTracker
- **NEW** optional extended life beater post bearings
 - Any rod option can be ordered with the extended life bearing kit
- Kohler Engine
 - No DEF
 - Simple, reliable engine package that uses a DOC
