

grape harvester

# Oxbo 6120 Grape Harvester

Introducing the Oxbo 6120, a dedicated grape harvester that utilizes Oxbo's Advanced Vintage Technology (AVT) system to deliver the highest quality fruit while maintaining in-field productivity. The AVT system ensures fruit integrity for added control in wine making operations. Each aspect of the AVT system works together to deliver more intact and cleaner fruit.

### Three fan cleaning system:

Proven effective at removing debris by removing M.O.G. at transition spots

### Center mount cab:

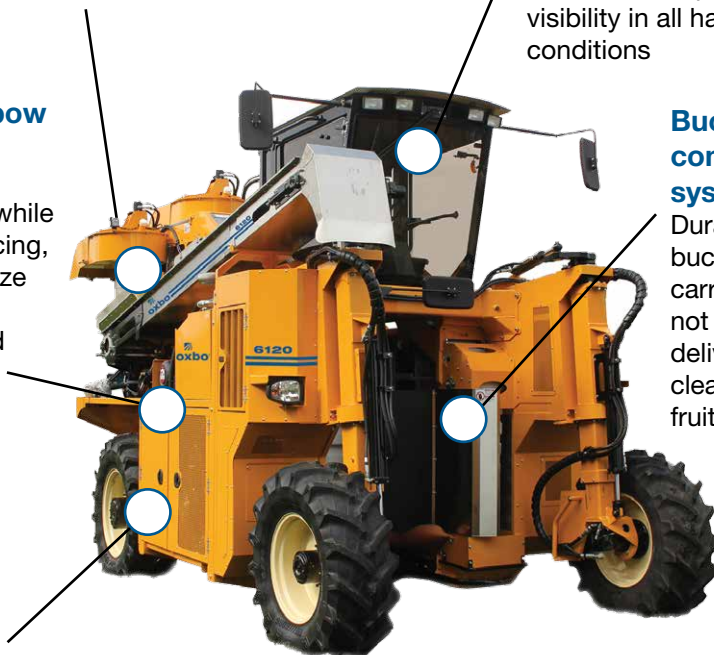

Comfortable, air conditioned cab is center mounted for optimal visibility in all harvesting conditions

### Soft-touch bow rod system:

Thoroughly removes fruit while minimizing juicing, easily customize the pick with hydraulic head spread

### Bucket conveyance system:

Durable buckets gently carry your fruit, not drag it, to deliver more clean, whole fruit

**Low mounted engine:** Delivers easy maintenance, excellent stability, and reliable performance

## Specifications

|                |                |                  |               |
|----------------|----------------|------------------|---------------|
| Length:        | 212 in (5.34m) | Tunnel Width:    | 30in (0.79m)  |
| Width:         | 118 in (3m)    | Machine lift:    | 26in (0.66m)  |
| Min Height:    | 144in (3.66m)  | Catching length: | 127in (3.23m) |
| Tunnel Height: | 77.5in (1.97m) |                  |               |
