#### Harvester weight

- **Total weight (6 wheel option with full fuel & oil tanks):** 68,390 lbs (31,021 kg)
  - Front four wheels: 49,490 lbs (21,995 kg)
  - Rear wheels: 19,900 lbs (9,026 kg)
- **Total weight (track option with full fuel & oil tanks):** 71,400 lbs (32,386 kg)
  - Front tracks: 51,500 lbs (23,333 kg)
  - Rear tracks: 19,900 lbs (9,026 kg)

#### Tires and Track size

- **Size:** 710/45-26.5
- **Inflation pressure:** 32 psi (2.2 bar)
- **Track dimensions:** 35” x 72”

#### Engine

- **Engine:** Scania DC13L Tier IV
- **Horsepower:** 450 hp @ 1550 rpm

#### Ground Speeds

- **Max road speed (for wheels and tracks):** 23.2 mph (37.34 km/hr)
- **Max field speed (for wheels and tracks):** 10.2 mph (16.4 km/hr)

#### Hopper Capacity

- **Capacity:** 5,000 lbs (2,270 kg)

#### Machine Leveling

- **Fore/Aft:** +/- 10%
- **Side-to-side:** +/- 18%

#### Tank Capacities

- **Fuel:** 310 gallons (1,173 L)
- **Diesel exhaust fluid (DEF):** 15 gallons (60 L)
- **Hydraulic fluid:** 175 gallons (665 L)

Descriptions and specifications subject to change without notice. ©2017 Oxbo International Corp. a member of the Ploeger Oxbo Group 6170.pdf
Oxbo is proud to introduce the next generation in pea, lima bean, and garbanzo bean harvesters. A new propulsion system eliminates the front four wheel motors and offers instead a mechanical 6 wheel drive option. With the availability of wheeled or track options, the Oxbo 6170 can fit the needs of all growers.

**Performance when it counts**
- Direct gear to gear drives inside bogie arms
- Enhanced braking capabilities
- Differential lock capabilities
- 23.2 mph wheeled machine road speed
- Improved product cleaning through advanced threshing design

**Tier 4 Engine**
The quiet, new Scania engine provides maximum horsepower with fuel sipping economy. The decreased engine speed makes the Oxbo 6170 our quietest pea harvester ever and it goes twice as long on oil change intervals.

**Enhanced Threshing System**
The Oxbo 6170 auger satellite beater is the next generation in threshing technology. Product is delivered to the hopper cleaner than before.
- Delivers up to 10% more capacity in certain conditions without sacrificing recovery or product quality
- Decreases threshing drum operating pressure and less load on rotating components
- Provides additional options for adjustments to optimize performance in challenging terrain and field conditions.
- 66% wider long pea conveyor

The new beater drive system lends itself to longer life beater drive components by eliminating the gear box, drive belt, belt tensioner, and other wear parts.

**Technology:**
- IQAN control & monitor system provides enhanced graphics on a 10.25” touch screen with improved diagnostics, a precisely adjustable load control system, and control functions.
- Trimble TMX display for Auto-Steer option
- FleetCommand Telematics for complete visibility of your fleet operations from your Smartphone, laptop or computer.

**Track drive option:**
New design offers increased belt life with uprated mechanical components to reduce maintenance for improved reliability.

**Increased operator comfort:**
The entire machine has been designed to include improved safety and ergonomic features. The stairway is designed for convenience and safety. For ease of service, there is ground level access for fuel and DEF refill.

**Load control system:** Increases productivity & product quality while reducing operator fatigue

**4740 header:** The proven and productive Oxbo 4740 pea header gently harvests your valuable crop.

**6170 cleaning system:** The new advanced threshing system produces a cleaner product, even in challenging conditions.

**Auto-lube system:** Optional full machine auto-lube is available to make sure your machine has a continuous supply of clean lubrication.

**Standard features**
- Automatic drum scrapers
- Remote picking reel height adjustment
- Automatic head shutoff
- Automatic ground roller speed adjustment
- Stainless top doors
- Chain oiling system
