Length:	5ft (1.52m)
Width:	6ft (1.83m)
Height:	18in (.46m)
Front bag storage area:	2ft 8in x 2ft 6in (.81m x .76m)

Bean Harvester

BH100

Pixall™ BH100

For over three decades, fresh market green bean, butter bean, and southern pea growers have relied on the effectiveness and efficiency of Oxbo's Pixall™ BH100 bean harvester.

The BH100 brings commercial harvesting technology to fresh market growers, helping them gain an edge in a competitive market where finding reliable hand harvesters is becoming more difficult every year.

Easy, reliable operation

- The BH100 can harvest any row width from 18 inches and up
- Beans are gently stripped from the vines by the effective picking head
- The BH100 features a powerful cleaning fan to remove leaves and other field debris
- Gives you the option to bag or box the harvested product on the rear platform

Fast harvest, fast payback

- Growers can justify the BH100 on as few as 5 acres
- The BH100 is able to pick all the beans on the plant, increasing the payback
- With the BH100 and a 40hp tractor, two people can harvest dozens of cases of clean, high quality beans per hour
- Mechanical harvest with the BH100 eliminates the headache and expense of sourcing hand laborers
- The gentle handling of the BH100 significantly minimizes any damage to your beans
- Fresh market customers appreciate the appearance of beans harvested by the BH100 that rival hand picked beans in every way

Premium product quality: Fresh market beans harvested by the efficient BH100

Effective picking reel: Gently combs the beans from the vines onto a belt conveyor. The BH100 cleanly harvests all the beans on the plant.

Loading versatility: The BH100 gives you the versatility of picking into bags, boxes, or other containers.

Convenient pull-type harvester: The BH100 provides gentle harvesting in a one-row tractor drawn model. Picking hundreds of cases of quality green beans is as easy as starting your tractor.

Clean product: A powerful suction fan removes leaves and other field debris

Cleaned, Sorted, Graded: Add the Vibratory Sorting Table and Even Feeder to complete your fresh market harvest operation.

Multi-crop: The BH100 easily picks green beans, edamame, butter beans, afilea peas, or southern peas.

Gentle handling: Cleaned beans are conveyed on a soft rubber conveyor to the rear platform
