

FRESH MARKET SOLUTIONS

Even Feeder & VST

Oxbo Even Feeder and VST

Hand-picked Quality

The Pixall™ Even Feeder and VST are stand alone products that work with your fresh market harvesting system to sort beans and eliminate both pin and broken beans. The result is mechanically picked produce rivaling hand-picked quality.

Even Feeder

The Pixall™ Even feeder utilizes a soft rubber conveyor to meter the beans at the rate of 1 bushel per minute into the VST (vibratory sorting table) giving the optimal sorting capabilities. The Even feeder has a 5-bushel capacity to allow 5 minutes of unattended feeding.

- *Single 110 volt 60 cycle motor*
- *Heavy duty 12 ga. steel constructions*

Vibratory Sorting Table (VST)

Designed and built in the USA to compliment the Even Feeder. The Pixall™ VST mechanically sorts out pin beans and broken beans leaving you with premium produce for store or road side stands.

- *Stainless steel corrugated pans*
- *Adjustable sorting pan gates*
