# Oxbo TS2 Cutter & Quad Puller System

## Highly Effective Detasseling

The Oxbo TS2 detassler offers you the most effective detassling with our accurate Detector™ controller technology. This unique system utilizes two pairs of the sender/receiver system per lifting arm to rapidly adjust to changes in plant height without need for constant cleaning. Individual row units are hydraulically powered up and down and travel in a directly vertical path.

Get more use from your high clearance sprayer. The Oxbo TS2 attaches to all Miller Nitro Sprayers. The toolbar is designed with durability in mind for the most reliable and accurate detasseling performance.

**Quick change Cutters and Pullers:** The Oxbo Quicklock system allows you to quickly change from cutters to pullers with no tools required. Simply disconnect the hydraulic hoses, pull the connecting pin (2 for pullers), rotate and lift unit off.

**Easily Configured to your field:** Toolbar can be adjusted to various configurations based on individual field planting patterns.

**AutoFold™ at touch of a button:** Hydraulic auto-fold makes the TS2 rapidly available for road travel all from within the cab. The rear folding design allows for improved weight distribution, increased maneuverability and faster road travel.

**CAN bus solid state technology:** User friendly controls rapidly respond to your subtle changes.

**Quick attach toolbar:** Hook and go toolbar allows you to attach and switch from spray to detasseling mode in a matter of minutes.

**Rugged design:** Detector™ system responds smooth and rapidly in wet, dusty or any other tough environments.

### Configurations available for Pre-4000, 4000 & 5000 Series Nitros

20"/30" adjustable	Adjusts between 12/14 and 18/20
18 over 20 with 20" row spacing	
12 over 14 with 30" row spacing	
12 over 16 with 30" row spacing	
12 over 14/16 with 30" row spacing	Adjusts between 12/14 and 12/16
12 over 12/14 with 30" row spacing	Adjusts between 12/12 and 12/14

### Configurations available for 4000 & 5000 Series Nitros

12 over 16 with 30" row spacing, 2x1 pattern	
12 over 14 with 60 cm row spacing	Auto-width adjust
12 over 14 with 63 cm row spacing	Auto-width adjust
12 over 14 with 70 cm row spacing, 6x2 pattern	
12 over 14 with 70 cm row spacing	

**Detector™ system:** Linear action row units quickly respond to height

**Fast acting cutters:** Leaves a flat and clean surface across rows

**Pullers second to none:** Effectiveness leading the industry

**Rapid fold:** Easy transition from field to road all within cab
