Oxbo Receives ISO 9001:2015 Certification

BYRON, New York, June 1, 2018 - Oxbo is pleased to announce that it has become an ISO 9001:2015 certified company. Leveraging an all-encompassing business management system measures and identifies opportunities and focuses on continuous improvement initiatives in all areas of Oxbo's business.

"This structure requires us to focus more on our processes, which in turn leads to customer satisfaction." Said Joe Perzia Senior Vice President of Operations. In recent years Oxbo has expanded its capabilities and product portfolio, which has required new and improved management processes in parallel. "These improved and expanded processes have increased our focus on both internal and external stakeholders while in parallel delivering more efficient and consistent execution." Perzia said.

Obtaining ISO 9001:2015 certification is a key step towards supporting Oxbo's role as the global leader in mechanized agricultural solutions for niche agriculture markets.

About Oxbo International Corp

Headquartered in Byron, N.Y., and with roots dating back to the 1950s, Oxbo International manufactures a wide range of specialty agricultural equipment including products that harvest processing and fresh market vegetables, berries, coffee, grapes, olives and seed corn. The company operates four manufacturing facilities in Byron, New York, Clear Lake Wisconsin, Lynden, Washington, and Cruz Alta, Brazil and several sales and service locations throughout North America. Oxbo supplies equipment worldwide to customers in more than 30 countries.
