

1996-2004 PSC156: MS18 Dyna Plus Conversion

In an effort to maximize Power to the Ground performance in wheel motors, Oxbo has introduced a Dyna Plus conversion for the MS18 wheel motor.

Previous MS18

Current Dyna Plus MS18

Advantages of the Dyna Plus

- Turn **enhancement** for steering in muddy conditions and better **traction** control
- **Dependable** modern electronic traction control utilizing the Sauer Plus 1 Controller in place of the HVS traction control system
- More **Reliable** Self Contained Braking System which allows little if any environmental contamination
- Reduced **Maintenance Costs** since brake shoes do not need to be relined and brake cables or brake cylinders do not need to be replaced
- Less **stress** on the cylinder block due to a large bearing support

Oxbo Kit Number	66893	66894
Years Compatible	2000-2004	1996-1999
