

PCS156 / Oxbo 61xx Series Combines Satellite Beater Shaft Improvement

In a continuing effort to offer the best value for your parts, Oxbo is now offering the satellite beaters with the shafts already installed. Previously, the beaters were assembled, balanced, and then disassembled to stock without the shafts.

Advantages of the Improved Process

- The assembled beater provides higher confidence in balance integrity.
- Customers can now receive the beaters fully assembled reducing the amount of on-site labor needed at their facility.
