

2000-2006 PSC156 Cosmos Kit 69108

In a continued effort to offer products to keep your harvesters running effectively. Oxbo presents, The Cosmos Combine Monitoring Kit. The Cosmos Kit will replace the current HVS monitoring system.

Note: The current-use HVS components are obsolete and have limited availability.

Previous HVS Monitoring System

- A CRT monitor in the cab
- Two or three control modules in the side console one of which contains the dual axis tilt sensor
- A series of sensors on the harvester

New Cosmos Kit

- A Danfoss 610 display
- A Danfoss 88 pin controller
- A Danfoss input module
- A dual axis tilt sensor
- A dual switch foot pedal
- New speed, temperature & pressure sensors
