

# Trimble Autopilot Automated Steering Systems for Oxbo Pea Combines

The Trimble® Autopilot™ automated steering system automatically steers your vehicle on line with maximum precision. When your vehicle gets offline, Autopilot signals it to adjust its position to follow the correct path so you can focus on the job ahead of you.

- Harvest quickly and accurately
- Share guidance lines between machines operating in the same field
- Reduce operator fatigue and increase safety
- Harvest day or night and in dusty or low visibility conditions

## Trimble Autopilot Automated Steering System

System includes FmX Integrated 12.1" display, T3 Terrain Compensation and Vehicle Sync. System is CenterPoint RTX Ready. Requires a separate service subscription purchased from Oxbo or Trimble for \$1,650.00 per vehicle for the annual service (1.5" 3.8cm accuracy). NO RADIO
