

Shaker Pan Frame Retrofit Kit

Part Number: 601342

The new shaker pan frame design provides improved protection for shaker pan motors to improve reliability of the shaker pan system. The shaker pan frame retrofit kit works on all model years of Oxbo 6420 & 6220 Harvesters. The new shaker pan frame design is being released with the Oxbo 6430 Harvesters.

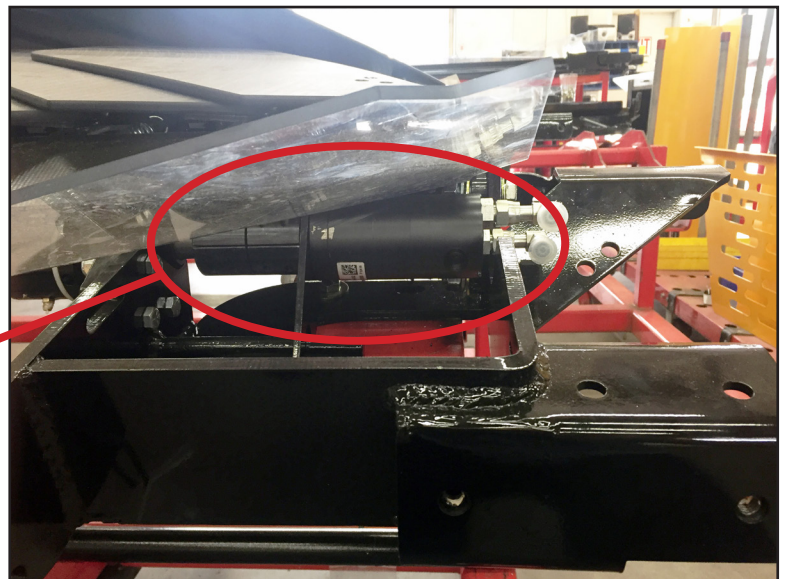

In the current design the shaker pan motors extend out the front of the frame weldment with no additional protection.

The retrofit kit includes the right and left side frame and shaft. (The kit does not include new motors)

In the new design the shaker pan motor is set back into the frame with additional protection mounts.
