

***OXBO PremiumSort* Pan Updates**

Part Number: 161032

The 2017 petiole pan design for the Oxbo 6120 improves the pan function. The pan features a larger juice return chute with more open area and latch handles on the underside of the pan.

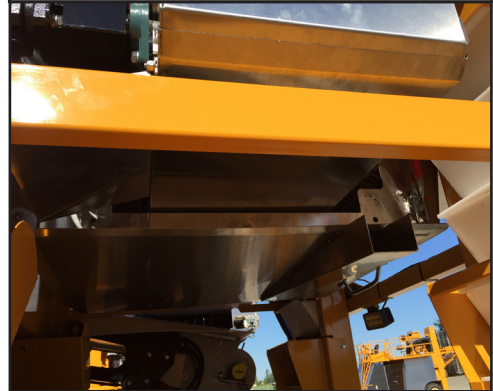

Part number 161032 includes: Pan weldment and two latches. Existing handles will need to be reused and the latch catches will need to be repositioned to the lower idler assembly.

This update is compatible with the 2016 design and the destemmer pan was improved for 2016 production. Older 6120 can be updated using part number: 106548 (latches number 900575 (qty 2) needs to be welded on).

Previous Pan Design (2015)
(Bolts Are For Truck-Transport Only)

Juice Return Chute (2015) w/latch handles on underside of pan

Destemmer Pan
(2016 and newer) with convenient latch design

Current Pan Design (2017)
New Latch Design
