

Trash Reduction Tunnel Panels

Part Numbers: **131176(L)** and **131177(R)**

A standard feature in all new 6430s, new lower tunnel panels for trash reduction are now available for all Oxbo model 6420s. Panels are easy to install behind the rear shaker posts and extend to the stinger. Panels improve the product flow through the tunnel as the buckets assist in moving product and harvest debris to the rear trash removers. In orchards with mature trees or trees with pruning debris, these panels work to help keep the tunnel clean and limit trash build up during harvest.

Model	6420	
Part	Left	Right
Part Number	131176	131177
